

Evision 4D : a semi-automatic counterfeit detector that accurates euro detector with value counting

Evision 4D Using various Infra-red and magnetic detection technologies, Evision 4D verify prescribed parameters on the euro banknotes.
Evision 4D counts the total sum and number of genuine banknotes detected.
The result is displayed in a large LED display.
In addition to a competitive price, Evision 4D has an attractive and compact design..

Features

- Using various advanced detection technologies, SuperVision mc verify prescribed parameters on the banknote.
- Specialized sensors perform a spectral analysis of the banknote print and the presence and location of magnetic reaction.
- Paper and print analysis by using UV light determination of special characteristics of banknotes.
- Capacitive sensor detecting precense of safety thread and laser technology provides reliable detection of various features.
- USD mode detects all US Dollar banknotes including old series from before 1988.
- EUR mode detects all Euro banknotes.
- Additional modes for detection of local currencies.
- Evision 4D is easy and fast to operate and it handles euro banknotes in all four directions.
- Evision 4D is tolerant to dirty and worn banknotes.
- Only one button is needed for the operation making it very easy for all cashiers to use.
- An acoustic signal will clearly indicate when a euro banknote is suspect and such note will not be counted.
- Approvements : RoHS compliant and CE marked
- Warranty : 12 months against all defects in material and labour.
- Detection: Infra-red magnetic print and magnetic thread sensors combined with length measurement
- Dimensions: (L) 22,0 x (H) 9,2 x (D) 13,2 cm
- Weight: 0,76 kg
- Detection/counting speed: 2 notes per second
- Transport system: Friction type, motorized
- Feeder system: Manual type
- Power: 100 - 240 V / 50 - 60 Hz (Adapter included)
- Internal rechargeable battery (optional)
- Power consumption: Less than 10 W
