

Supervision 1100 : Automatic multicurrency banknote detector and counter

Supervision 1100

Automatic Multicurrency banknote detector

Portable with Built-In Battery

Value counting and sorting

Using various advanced detection technologies, SV1100 verify prescribed parameters on the banknote.

Specialized sensors perform a spectral analysis of the banknote print and the presence and location of magnetic reaction.

Paper and print analysis by using UV light determination of special characteristics of banknotes.

Features

1. Automatic objective verifier, counter and sorter. (foto 3)
2. Handles 4-5 currencies maximum.
3. Currency mix can be composed from several local currencies (contact us).
4. Suspect banknotes generate transport stop and the note can easily be removed.
5. Portable lightweight design with built-in battery. (foto 2.)
6. Counting results can be printed instantly on an external thermo printer (optional).
7. Easy-open transport system for maintenance and cleaning. (foto 1)
8. User friendly large backlit LCD-display and easy-to-use keypad.
9. Handles banknotes in all four directions. (foto 4)
10. Five different processing modes for counting and sorting (with or without detection).
11. External display (optional).
12. USB connection interface for easy upgrade of installed currencies.

Specifications

3. Detection : Multiple wavelength absorption and reflection technology combined with magnetic sensors
4. Dimensions : (L)23,5 x (H) 6,7 x (D) 14,0 cm (folded – foto 2)
(L)45 x (H) 11,5 x (D) 14,2 cm (expanded – foto 1)
5. Weight : 1,25 kg (with battery)
6. Detection/counting speed : 4 notes/second
7. Hopper capacity : 60 notes (with hopper extension, min 100 notes)
8. Stacker capacity : 100 notes orderly parked
9. Transport system : Friction type - Feeder system : Automatic type
10. Warranty : 1 year
